

We Bridge Ideas to Solutions™

Sense, Regulate and Drive with HALL EFFECT SENSORS, CURRENT SENSORS, POWER MANAGEMENT, BLDC Motor Drivers for Industrial & HEV/EV Automotive. XtremeSense TMR technology to provide superior magnetic sensing performance for use in many applications and enables high magnetic sensitivity, stable performance over temperature, low noise and low power consumption.

Good-Ark Semiconductor is a leading global discrete semiconductor manufacturer offering innovative discrete semiconductors with increased power density and energy efficiency in pursuit of environmental sustainability and cost effectiveness. Good-Ark is one of the largest Diode, Rectifier & Bridge Rectifier manufacturers in the world and is the industry leader in SMA/SMB/SMC & DFN/QFN package types and offering a full portfolio of AECQ Automotive solutions. Additionally, Good Ark is THE key partner to some of the leading EMS/CM providers in Asia.

CRYSTALS, OSCILLATORS and FILTERS, SMD and leaded crystals, oscillators and monolithic crystal filters. Ultra- Miniature and low-profile packages. SPXO, VCXO, TCXO, VCTCXO, TSX, MEMS Timing Products. www.kds.info

LXD Research & Display designs and manufactures liquid crystal displays. Specializing in high reliability displays for hazardous environments, LXD products include: glass displays, modules displays, TFTs, OLEDs, and sunlight readable displays. Product lines include TN, STN, HTN, FSTN, CSTN, TFT and LCM. . www.lxdinc.com

Microelectronic Components offering Trusted system-in-package solutions, high-density memory and secure SSDs optimized for the edge in Military & Aerospace applications. www.mrcy.com/products/microelectronics

Surface mount and through-hole capacitors. Aluminum electrolytic, Aluminum polymer, Hybrid Polymer, DC Link, film capacitors and diode arrays. A full line of AECQ for EV's. www.nichicon-us.com. Additionally, Nichicon is the North American provider for Italy's ICEL Corp and their Box-type Film Capacitors used for DC-Link, Snubber, Motor Run & AC Filters

Sensitron Semiconductor products provide HiRel for switching power supplies, AC-DC rectification, primary & secondary power distribution, motion control, transient voltage spike protection, HiRel Screen bare die and custom applications. www.sensitron.com

VPT Components is a provider of High-reliability bipolar junction transistors, including radiation hardened versions, qualified to MIL-PRF-19500. MOSFETS offered in JANS and JANSR equivalent options www.vptcomponents.com

VPT Power is a leading provider of Hi-Rel power conversion solutions for avionics, military and aerospace, including DC-DC converters and EMI filters. www.vptpower.com
